Alternative construction for draught-proof enclosure	<ul style="list-style-type: none"> - Draught-proof enclosure - Alternative construction - Annex D 	CTL-ETF5 - OSM/LUM	2022 CTL Plenary Meeting
Question			
<p>What is the requirement for an alternative construction instead of using the draught-proof enclosure according to Annex D?</p>			
Decision			
<p>The construction needs to provide the same draught protection as the draught-proof enclosure according to Annex D. A construction or room with a draught of < 0,2m/s is deemed to meet this requirement. (see also 34D/1547/DC)</p>			
Explanatory notes			
<p>The value 0,2 m/s has been taken from IEC 60068-2-2:2007 Environmental testing – Part 2-2: Test-Test B: Dry heat (clause 4.2).</p>
